BYEJID MONDAL

OBJECTIVE

Biotechnology postgraduate with an interdisciplinary foundation in biotechnology, biochemistry, and genetics, preparing for doctoral training. Demonstrated analytical capability through a high-achieving MSc research project involving systematic literature review and comparative meta-analysis. Proficient in evaluating research evidence, applying statistical interpretations, and utilizing biological sequence-analysis tools and databases. Motivated to transition into translational research, with a developing interest in molecular approaches to disease and cancer genomics, aiming to build robust experimental and computational skills within an innovative PhD programme.

EDUCATION

Garden City University – Bengaluru India **July 2024**

Bachelor of Science in Biotechnology, Biochemistry and Genetics

University of Greenwich – London, UK **October 2025**

Master of Science in Biotechnology

RESEARCH INTEREST

Cancer Genomics and Liquid Biopsy (ctDNA)

Genomics and Bioinformatics Applications

Molecular Mechanisms of Disease

Developmental Biology and Embryology

EXPERIENCE

Biomedical Coder Intern

Gravita Oasis Review and Solutions – Bengaluru, India **June 2023 – September 2023**

- I trained in ICD-10 codes and medical terminologies, along with healthcare documentation standards.
- I handled medical records on patients and provided proper diagnostic codes that can be used in billing and research.
- Assured adherence to healthcare regulations, compliance and quality assurance measures.
- Gathered with senior coders to clarify discrepancies and achieve better results of the data.
- I learned good attention to details and analysis that could be utilized in entering data and in administration.

Comparative Efficacy Research Project

University of Greenwich – London, UK **May 2025 – August 2025**

- Conducted a systematic literature review and comparative meta-analysis evaluating the efficacy of topiramate versus naltrexone for Alcohol Use Disorder (AUD).
- Screened studies, extracted data from peer-reviewed clinical articles, and performed comprehensive statistical synthesis utilising JASP.
- Applied random-effects modelling, Cochran's Q and I^2 tests for heterogeneity assessment, and Egger's test for publication bias to rigorously evaluate research evidence.

- Generated and interpreted forest plots, funnel plots, and sensitivity analyses to ensure robust statistical conclusions.
- Delivered a formal oral presentation of findings; selected by university faculty for an academic showcase due to clear scientific communication.

CERTIFICATION & ACTIVITIES

- **Nuvedo Official 2021** – Hand on Workshop Certificate
- **International Business Machines Corporation (IBM) –** Introduction to Cybersecurity Essentials
- **Northwestern University – Evanston, Illinois –** High-Performance Collaboration: Leadership, Teamwork and Negotiation
- **University of Colorado Boulder, Colorado –** Teamwork Skills: Communicating Effectively in Groups
- **University of Greenwich –** Got selected to show my comparative efficacy research project, where clear communication and actual scientific interaction were displayed.

SKILLS

Research Methodology	Systematic literature review
	Comparative meta-analysis
	Clinical data extraction
	Study screening
	Evidence synthesis
Statistical Analysis	Academic exposure to JASP
	Random-effects modelling
	Heterogeneity assessment
	Statistical visualisation
Biological Tools	Academic exposure to BLAST, MEGA, Ensembl, Benchling, and NCBI databases
Professional Skills	Scientific writing, research documentation, ICD-10 coding, clinical literature interpretation.
